

CASE STUDY

Leading Multinational Infrastructure Organization Trusts SBA Info for Fast and Reliable Data Recovery & Backup

The Client

Our customer is a leading India-based multinational construction organization with global operations. They address the needs of engineering and infrastructure sectors with a customer-focused approach and conformance to global HSE standards. Their technological capabilities facilitate them to reach various nodes and build a network spanning products, processes, employees, environment, and community. This holistic consideration of actions, outcomes, and impact, accelerates and amplifies returns across all capitals and showcases how our customer adds value to their stakeholders.

Business Need

Our client wanted to improve data management and protection while accessing high-priority and frequently needed data sets.

They wish to address the challenge of the ever-growing volume of data by creating latency in the data backup process with flexible and fast recovery of data. Our client wanted to enhance their data management process to improve operational efficiency while reducing manpower utilization.

The Solution

With strong domain knowledge and a proven industry track record, SBA Info implemented a data management & backup solution. Our certified resources, technical expertise, and process-driven approach help create a data backup solution with fast storage to make digital copies available and accessible from anywhere.

SBA Info's storage and backup solution reduced the need of creating multiple backup copies by using copy data management and ensured backup & data protection from encryption tampering.

Results

Our customer achieved numerous benefits out of the proposed data backup solution. Some of them include,

- Data security and protection.
- Operational efficiency
- Efficient & flexible data recovery
